

1. The hallways are atrocious, esp. the high school. I have to push my way through. The tunnel at the Joe is like the hallways

2. B

3. A.

4. Evenly distribute them.

Town Questions

1. I put a lot of people in the towns, because that's where jobs might be. Some in the suburbs in case people still wanted to be close to work. Lots of people in the college dorms. I did not put a lot of people near nuclear plant or garbage dump.

2. People live near resources they need or that are appealing to them.

3. The average # of people living in a certain location. How crowded a region is.

4. Total People \div Total Land Area
 $400 \div 80 = 5$

5. It could make us need more services or cause roadways to be busy on a commute

6. Apartments in cities and dorms in college.
More people = smaller housing.

7. Need for Public Transportation. We might have smog.

8. We will need to import food.

9. College and City life will contrast with Farm life - more people, rushed, not as ~~many~~ much personal space.

10. Where I live, there's only two other people, but if I moved to the city there would be a 100. Population Density is an average!
